

Mentoring

Market Commentary: As part of the Gold Program, we would be sending you market commentary on a daily basis. This will broadly be sent to you, 3 times a day and will help you gauge the market sentiment and perform on your portfolio management module. We would be sharing this on a Telegram channel that we would make you join as well as on WhatsApp. Along with this, we would also be having a Mentors Podcast every week where we'll be talking on certain topics relevant to that week's news and activity.

Personal Interactions: As part of the FMEP Gold Program, we would also be having personal interactions with you. The team's availability is from 10:30 AM to 6:00 PM on Monday to Friday. In case you have any doubts or want to have a personal mentoring interaction, you can reach to us during these hours. For a personalized mentoring interaction, you can simply send a screenshot of your portfolio performance page on Telegram or WhatsApp during these hours and we will comment on it as well as give our feedback, at the earliest available time so that we can have a discussion on the same. In case you have any questions on the concepts that are covered as part of the training resource, you can also reach out to us and we can discuss that as well.

No Stock Tips: Please note that all mentoring interactions that we have among each other are educational and will be to improve your analytical skills and are in no way for stock tips that can lead to quick growth.

Research: To complete the research project, you have to first pick any one sector of your choice, followed by two companies each from the sectors. Followed by this, you would be authoring detailed reports on the sector and the company that you have picked. When you log in to finlatics.com, you can go to the Research section and you will be completely guided on how to tackle each week and subsequent submission. Incase you need any help, you can reach out to us from 10.30AM to 6:00PM.

Warm regards,

Nisant Mohta's Team
